1. Which of the following will correctly start Beeline on the VM? Check all that apply.

    1 / 1 point

    ☐ beeline -connect jdbc:hive2://localhost:10000 -n training -p training

    ☐ beeline -connect hive2 -n training -p training

    ☑ beeline -u jdbc:hive2://localhost:10000

    > ✓ **Correct**
    > Correct. This specifies the URL for connecting to the Hive server.

    ☐ beeline -connect jdbc:hive2://localhost:10000

    ☐ beeline -u hive2

    ☐ beeline -u hive2 -n training -p training

    ☑ beeline -u jdbc:hive2://localhost:10000 -n training -p training

    > ✓ **Correct**
    > Correct. This specifies the URL for connecting to the Hive server, and includes the optional credentials (username and password).

    ☐ beeline -connect hive2

2. Which pair of statements allow you to start and quit Impala Shell?

    1 / 1 point

    ○ **impala-shell** and **!quit**

    ○ **impala shell -u jdbc:hive2://localhost:10000** and **quit;**

    ○ **impala shell** and **quit;**

    ○ **impala-shell -u jdbc:hive2://localhost:10000** and **quit;**

    ● **impala-shell** and **quit;**

    ○ **impala shell -u jdbc:hive2://localhost:10000** and **!quit**

    ○ **impala shell** and **!quit**

    ○ **impala-shell -u jdbc:hive2://localhost:10000** and **!quit**

    > ✓ **Correct**
    > Correct. Impala Shell is started by the hyphenated **impala-shell** with no need to specify a connector, and exited using a **quit** command with a semicolon.
