Week 1 Core Quiz

LATEST SUBMISSION GRADE

100%

1. Which best describes what the circled area in the following screen capture is used for?

1 / 1 point

○ ● Entering and running SQL statements

○ Browsing databases and the tables within them

○ Clicking on a database name and seeing what tables are in the database

○ Choosing which query engine to use

✓ **Correct**
Correct. This is the query editor. You can type SQL statements in the text box and then run them using the Execute arrow or typing **Ctrl (Control)** + **Enter**.

2. Which steps in Hue will list the tables within a database?

1 / 1 point

○ Run **SHOW DATABASES** and then run **LIST TABLES**

○ Use the active database selector to change to the database, and then run **SHOW DATABASES**

○ Use the active database selector to change to the database, and then run **LIST TABLES**

● Use the active database selector to change to the database, and then run **SHOW TABLES**

○ Run **SHOW DATABASES** and then run **SHOW TABLES**

✓ **Correct**
Correct. **SHOW TABLES** will list the tables in the active database.

3. What are the steps to run a **SELECT** statement in Hue?

1 / 1 point

○ Click the **Query** button or **Query** dropdown to select the query editor you want to use. Enter the **SELECT** statement in the text box. Then run the statement by typing **Enter**.

○ Navigate to the Table Browser and click on the table you want to use. Enter the **SELECT** statement in the text box. Then run the statement either by clicking the blue Execute arrow or typing **Ctrl (Control)** + **Enter**.

○ Navigate to the Table Browser and click on the table you want to use. Enter the **SELECT** statement in the text box. Then run the statement by typing **Enter**.

● Click the **Query** button or **Query** dropdown to select the query editor you want to use. Enter the **SELECT** statement in the text box. Then run the statement either by clicking the blue **Execute** arrow or typing **Ctrl (Control)** + **Enter**.

✓ **Correct**
Correct.
